The February 2018 Book Selection is:

The Voyage of the Beagle

By Charles Darwin

In 1831, Charles Darwin embarked on an expedition that, in his own words, determined my whole career. **The Voyage of the Beagle** chronicles his five-year journey around the world and especially the coastal waters of South America as a naturalist on the H.M.S. Beagle. While traveling through these unexplored countries collecting specimens, Darwin began to formulate the theories of evolution and natural selection realized in his master work, *The Origin of Species*. Travel memoir and scientific primer alike, *The Voyage of the Beagle* is a lively and accessible introduction to the mind of one of history's most influential thinkers.

Read the book & then join us for brunch and discussion in the CCYC Board Room at 12 noon Sunday, February 18th
